

## SAFETY

### Elevating Safety

We'll admit it. Your safety is good for our business. It's good for yours, too. But here's the real bottom line: We all want to operate as safely as humanly possible. That's why we've put together a full range of programs designed to help aviation operations – regardless of size – stay at safety's leading edge. These include our comprehensive initiative, Performance Vector, one of the industry's best collections of safety support programs.

Director of Aviation Safety Programs - Our safety expert offers a depth of experience in safety practices and processes that can help aviation operations build on and improve their safety culture and existing safety protocols.

Premium on Safety - Our quarterly newsletter covers safety topics ranging from aircraft technologies to accident statistics to physiology. We distribute Premium on Safety to more than 12,000 customers worldwide.

Safety Bucks - Since 1997, we have distributed more than \$5 million in Safety Bucks, which rotary-wing operators use as credit with select training organizations.

Safety Posters - Our quarterly safety posters continue a long tradition extending back to the mid-1970s. To date, more than one million posters featuring topical safety messages have been distributed to operators around the world. You may download our safety posters at [usaig.com](http://usaig.com).

Safety Forums - We provide and sponsor speakers for informative presentations at regional safety forums, addressing topics of highest interest and importance to aviation operators.

Individualized Emergency Response Planning - We help customers develop organization-specific emergency response plans and support exercises and drills at the customer's operation.

Flight Organization Assessments - We can provide a third-party perspective and expertise during preparations for IS-BAO or other audits, as well as flight department safety surveys.

PERFORMANCE  
**VECTOR**  
A Safety Initiative of USAIG

**Emphasizing Human Factors to Minimize Error in Aviation**

Performance Vector delivers valuable, forward-looking support for your safety programs. Support options include practical human factors training and strategic tools to enhance safety management systems that meet specific operator needs. Most options integrate convenient web-based access.

- ▶ Complimentary for insured operators of turbine-powered aircraft.
- ▶ Additional Performance Vector allowance each time policy is renewed.

**Performance Vector Support Options**

- ▶ Individual online pilot, technician and fatigue management training.
- ▶ Reimbursement for line service training the operator selects and purchases.
- ▶ Human factors webinars for groups an entire flight department or relevant divisions.
- ▶ Industry-leading access to safety data and tools to support your SMS and fatigue risk management initiatives.
- ▶ Credits redeemable by helicopter operators toward select flight training.
- ▶ Help preparing for an IS-BAO audit, including a complimentary copy of the IS-BAO Standard and training resources to focus and ease expense of audit preparation.

PERFORMANCE  
**VECTORPLUS**  
By USAIG

**A Welcome Return on Your Safety Investment**

Earn good experience premium returns with Performance Vector PLUS and extend your safety programming. Insured business aviation operators qualify for a 5 percent premium return when they avoid losses and meet any one of three industry safety standards.

- ▶ Achieve and maintain IS-BAO registry.
- ▶ Ensure that all pilots successfully complete twice-yearly simulation-based training in the make and model flown.
- ▶ Successfully implement an industry-recognized flight operations quality assurance (FOQA) program that covers all aircraft operated.

Operators who meet all three safety standards and avoid losses qualify for a full 15 percent premium return, and are eligible for additional benefits.

- ▶ A customized package of Performance Vector safety programs designed to help flight departments meet their safety objectives.

PERFORMANCE  
**VECTOR**  
UNMANNED By USAIG

**Safely Sharing the Skies with Unmanned Aircraft Systems**

Created separately for UAS-only policyholders, Performance Vector Unmanned helps foster safe use of sUAS by providing operators with the tools to be fully compliant with all regulations. This program helps create a competent and responsible operator base for commercial UAS.

- ▶ Complimentary for insured UAS-Only policyholders.
- ▶ Instructs commercial operators in small UAS components, aerodynamics and performance, and the elements of UAS operation - including regulations and compliance.
